Carbon Reduction Policy

Solar Dynamics Ltd

1. Policy Statement

Solar Dynamics Ltd is committed to reducing greenhouse gas (GHG) emissions across all areas of its operations and supply chain, in line with UK climate targets and the company's Environmental and Net Zero commitments.

As a renewable energy specialist, Solar Dynamics Ltd recognises both its responsibility and opportunity to lead by example in the transition to a low-carbon economy. Carbon reduction is embedded into business strategy, operational decision-making, and project delivery.

2. Scope

This policy applies to all activities undertaken by Solar Dynamics Ltd, including office operations, design, installation and maintenance activities, vehicle use, procurement and supply chain engagement, construction and embodied carbon, and waste management.

This policy applies to all employees, directors, contractors, and suppliers acting on behalf of Solar Dynamics Ltd.

3. Carbon Reduction Commitments

Solar Dynamics Ltd commits to achieving Net Zero operational carbon emissions in line with UK government targets, measuring and monitoring carbon emissions across Scope 1, Scope 2, and relevant Scope 3 sources, prioritising carbon reduction over offsetting, and continual improvement through annual review.

4. Key Carbon Reduction Measures

Operational emissions will be reduced through low-emission vehicles, renewable electricity procurement, improved energy efficiency, and optimised travel.

Company No.: 13162795
Registered in England and Wales

Supply chain emissions will be addressed by prioritising environmentally responsible suppliers and reducing embodied carbon.

Waste will be minimised through reuse, recycling, and efficient resource use.

Solar Dynamics Ltd will continue to support clients in achieving carbon reduction through high-performance renewable energy systems.

5. Monitoring and Review

Carbon reduction performance will be reviewed annually and this policy updated as required.

Approved by the Board of Directors
